

D'Elboux Manuscripts Indexed Abstracts

Scope

The four volumes of monumental inscriptions and heraldic material, copied and supplemented by Mr R. H. D'Elboux in the 20th century, and published by the Kent FHS on microfiche sets 1756, 1757, 1758 & 1759. Much of the original material was collected in the 18th century by Filmer Southouse, John Thorpe, William Warren and Bryan Faussett.

Arrangement

Entries are arranged alphabetically, by heading ~ usually the name of a Kent parish, but if this is unknown or not applicable, two general purposes headings are used ('heraldry' & 'miscellaneous').

Each entry provides a detailed abstract of one page or loose-leaf sheet ~ some entries may include details from the first few lines of the following page. Each entry's heading includes a reference to the original page on microfiche, using the format noted below.

Entries provide details of personal names (abbreviated forenames are expanded), relationships, dates and places ~ they do not include ranks (except for people only identified by rank), royalty, occupations, biographical details, verse, heraldic descriptions, sources or the names of authors. Entries are numbered, and these are used in the Surname Index starting on page 129.
