- 1826 Pigot and Co's Directory of Kent

Arrangement

Entries are arranged alphabetically, headed by the name or location of a school. Each entry provides a summary of the principal occupants, giving their names, occupations and the current name of the establishment.

- many schools were not 'named', and are listed under the name of a street or parish
- some schools may be unknowingly listed under two or more entries
- some schools may appear under a name that was used only for a limited period (if they were sometimes known by a location-derived name, the Index may help to identify these)

There is an Occupants Index starting on page 29, and a Locations Index starting on page 34 ~ a location is shown in the Index only if it does not appear in the entry's heading.
